09/24/13 15:50 CLK

September 24, 2013

Esteemed Mayor and City Council,

In this packet is:

1. A response to the proposed Ordinance Pertaining to Outdoor Food Sharing Activities that you will hear on October 1.
2. A full set of signed petitions.
3. A Cliff Bar – Councilmembers need to eat too.

Position:
Rather than approve a permitting process that, as evidenced below, will address only a small fraction of the issues raised by property and business owners, direct City Staff to work with community stakeholders to establish an indoor location that will move people from crisis to self-sustainability. In so doing, you will not only have the opportunity to reduce the numerous complaints you receive, but also address multiple items in your Safe, Clean, and Green priorities.

A few of many comments from Petition Signers:
"These are excellent recommendations for the benefit of the City." Ee Reuling

"This is a sensible solution to the underlying problem that needs to be addressed and fixed." Apolonio Rivera

"Providing food to the hungry is not problematic.... Providing food to hungry people addressed that nutritional problem. Putting out more trash containers addressed litter problems... If you see a problem, target THAT problem, not a collateral issue. – Rev. John Rawlison, Ph.D.

"... work with all stakeholders on effective cost savings solutions" Kathryn Lamphier

"This is a human problem. We need a human solution not a bureaucratic one." Marcy Timberman

"A center at which homeless persons can access services in a coordinated manner...will greatly resolve the fragmented nature of services provided now, and help homeless persons direct more of their time and energy (and limited resources) toward meeting their basic needs, as well as improving their life circumstances. Such a center has been needed for a very long time. Let the City of Hayward stand up and be the example for the rest of the Bay Area!" Nancy Schluntz

"It would be better for Hayward to find positive solutions instead of punitive action." Joanne Gordon

"These groups have been asking for years for viable options, but now the city fathers are answering by wanting to issue permits? Please stop this!" Patricia Milner

RESPONSE to Proposed City of Hayward Ordinance Pertaining to Outdoor Food Sharing Activities in Downtown Hayward.
Responding to City of Hayward Community Meeting Presentation on September 7, 2013 at Hayward City Hall

From City Staff Presentation: Background/Why the need for a Food Sharing Ordinance?
"As described in the March 5, 2013 City Council report, the City continues to receive many reports about the negative impact that unregulated Downtown outdoor food sharing activities have on the quality of life and economic well being of residents, local businesses, property owners and visitors to Downtown Hayward."

From the March 5, 2013 City Council Staff Report: "Specific complaints reported to the City include:"	**Proposed Ordinance Provisions:**	**Response:**
Frequent overflowing City trash cans as well as litter and debris left on and around the food-sharing sites (which have also attracted illegal dumping and litter by other people not associated with the outdoor food-sharing activities)	Payment of a refundable deposit for cleaning or repairs. Reimbursement agreement with the City for cleaning or repairs.	Trash cans are often full before meal programs begin. For this reason, many meal program providers take trash with them at the end of their food service. All providers review the area before they leave for stray items/debris. Spillage and missed pick-ups from Waste Management contribute to this issue. How debris is specifically identified with meal providers is unclear. Moving meal programs to a centralized location can ensure consistent proper trash and debris disposal.
Trespassing by food recipients on nearby private properties before and after outdoor food-sharing takes place	"Hold harmless" agreement with the City for claims or lawsuits that may arise from the event.	Proposed ordinance will not alleviate this issue as permitted meal programs will be allowed to continue in the current locations.
Human waste (i.e., feces, urine, and vomit) left on nearby public and private properties	None.	After 8pm Mon-Wed and Sunset other days of the week, there are no public restroom facilities available in the City of Hayward. Per community meeting on 9/11/2013, such occurrences appear to be happening during late night/early morning hours. No meal programs occur during this time frame.
Periodic altercations and other unruly or aggressive behavior occurring among food-sharing participants before, during, and after food has been served	"Hold harmless" agreement with the City for claims or lawsuits that may arise from the event. Proposed ordinance will not prevent altercations.	Participants in and providers of meal programs have written a code of conduct. Enforcement of this code is difficult in an open area; ordinance does not provide a mechanism for preventing altercations and relies on law enforcement to address issues after they occur. In coordinated, indoor locations, enforcement of this code has prevented altercations.

For more information, contact Sara Lamnin, Program Director Hayward Community Action Network, a program of South Hayward Parish ~ (510) 432-7703 ~ saralamnin@sbcglobal.net

From the March 5, 2013 City Council Staff Report: "Specific complaints reported to the City include:"	Proposed Ordinance Provisions:	Response:
People camping on the food-distribution sites, in nearby San Lorenzo Creek, in large garbage bins behind Downtown stores, and in store fronts and other building alcoves in and around Downtown Hayward.	None.	Camping, like trespassing, is an issue separate from meal programs, which needs to be addressed in a coordinated and consistent method. Current wait time for space in a shelter program is 3.5 months. Permanent housing wait is typically 1- 3 years. There are no extremely low income housing units in Hayward for the average population of meal program participants (ie: Single adults, age 45 with no income)
Concerns about the safety of those being served have also been reported. Specifically, there is concern about the potential of food recipients becoming ill from the provision of unregulated food.	Provide proof of compliance with State and Alameda County public health regulations regarding food preparation and food handling. Provide proof of insurance. Any food sharing activities occurring outside of the 5 City Parks identified in the ordinance would not be affected and therefore would remain unregulated.	No food related illness incidents related to the outdoor meal programs have been reported in the past 6 years. How compliance will be measured has not been stated; however, it could require completing one or more classes as well as a certification of the kitchen facilities used. Alameda County Food Safety Training and Examinations are scheduled once every other month from February through October. The eight hour class costs $131.00 for a new individual certification. As proposed, meal program providers would be required to have food safety completed by mid-November, however, if the October class is unavailable (due to overscheduling or cost), the next available class will be in February, 2014. Proof of insurance for groups not affiliated with a larger insured entity could cost hundreds of dollars and take far more than 30 days to process. Enforcement of current City policies costs over $100/hour. This number is approximately tripled if arrests are made. Costs for inspections of meal providers' facilities or other compliance components are not yet available. Providing a single indoor site would ensure consistent compliance with low enforcement costs.

From the March 5, 2013 City Council Staff Report: "Specific complaints reported to the City include:"	Proposed Ordinance Provisions:	Response:
Outdoor food-sharing can be problematic for both those serving and receiving food during inclement weather without the proper facility or shelter.	Meal programs with permits would be allowed to continue service in City parks.	Moving programs to a centralized and coordinated indoor facility would alleviate this concern. Any food sharing activities occurring outside of the 5 City Parks identified in the ordinance would not be affected and therefore would remain unregulated.
It is also noted that the City may be exposed to legal claims stemming from injuries to individuals, or damage to personal property, associated with the outdoor food-sharing operations occurring on City property.	"Hold harmless" agreement with the City for claims or lawsuits that may arise from the event. Provide proof of insurance.	

SUMMARY:

The proposed permitting process would have very limited impact on the concerns identified by City Staff and would increase enforcement requirements. A centralized location for meal programs and adjunct services and engagement opportunities would not only address more of the concerns identified, but also facilitate more productive solutions for those involved in the meal programs. While the City Staff report shared during the Community Meetings on September 7 and 11 acknowledges the importance of a center, there are no timelines or workplans in place or a staff proposal regarding creating this vital solution.

RECOMMENDED COURSE OF ACTION IN PLACE OF PROPOSED ORDINANCE:

1. **Utilize existing Hayward Task Force to End Hunger and Homelessness, or convene additional stakeholder group to establish location and logistical plan for a centralized resource and recovery center. All meal programs would move to this center as well as services, groups, job development, and other opportunities for self-sufficiency and support. Plan to be developed by January 17, 2014.**

2. **Open the Center by March 1, 2014**

3. **Evaluate the impact of the center (including impact on the concerns identified above as well as County and State regulations related to ending homelessness and alleviating hunger). Make adjustments during this 6 month evaluation period as needed.**

4. **Develop and implement additional City ordinances as needed once evaluation of remaining issues is complete.**

Dear Hayward City Council,

We are pleased to present you with this petition affirming this statement:

"Whereas Food is a fundamental human need and sharing food can be inspired by faith, friendship, and/or abundance; and

Whereas the US Census reports that nearly 20,000 Hayward residents are unemployed and/or living in poverty, meal programs can be a lifeline, but can also be difficult to access if scattered throughout a broad area; and

Whereas debris, waste, and poor and unsafe behaviors occur in public spaces, however, these issues do not occur during the meal programs; and

Whereas outdoor meal programs do not currently have the capacity to provide accommodations for hygiene, participant contribution, and/or supportive services in addition to meals which are important in the move from crisis to stability.

Therefore, be it resolved that we, the undersigned, support collaborative solutions to ending hunger and homelessness. Such solutions must resolve the impact of negative behaviors in public spaces while reflecting the needs of the local community and creating opportunities to address the underlying causes of those needs. Building on the models demonstrated by South Hayward Parish in Hayward, Delancy Street in San Francisco, and Aware Recycling in San Diego we strongly urge the City of Hayward to:

1. Utilize existing policies, procedures and ordinances to protect public safety and resources/spaces, rather than creating a new, costly permitting process that does not address underlying causes of hunger or homelessness.

2. Work with all stakeholders to develop a centralized service center that efficiently and effectively utilizes existing resources to address the root causes of hunger and homelessness in Hayward by January of 2014.

3. Apply all existing laws - especially those related to smoking, litter, encroachment, and parking - consistently and fairly across the City."

Attached is a list of individuals who have added their names to this petition, as well as additional comments written by the petition signers themselves.

Sincerely,
Sara Lamnin

Let us work together toward food security and poverty alleviation for the people of Hayward!

Being a resident of Hayward for years I have applauded the efforts of those who feed the less fortunate of our community. Why in the name of everything humane must they now get permits to do the one thing that we as humans have the duty to due? To take care of those less fortunate. I am saddened that our elected officials of my city have nothing better to do but to try to pass ridiculous legislation when there are far more other serious matters facing our city. Give them a place to feed the poor, not condemn them for doing it. This is nothing new! These groups have been asking for years for viable options..but now the city fathers are answering by wanting to issue permits??? PLEASE STOP THIS!!!!

Patricia Milner
Hayward, CA 94544
Sep 12, 2013

I support the efforts to use existing statutes and not add new costly permitting requirements that will not address the core issues being discussed. We need to deal with homelessness, hunger and poverty in general--not add bureaucratic red tape complicating an already complex social challenge.

Sep 11, 2013

A center at which homeless persons can access services in a coordinated manner (such as has been established in Fremont, for example) will greatly resolve the fragmented nature of services provided now, and help homeless persons direct more of their time and energy (and limited resources) toward meeting their basic needs, as well as improving their life circumstances. Such a center has been needed for a very long time. Let the City of Hayward stand up and be the example for the rest of the Bay Area!

These are excellent recommendations for the benefit of the city. Eden UCC puts a high priority to feeding of the hungary as does FESCO.

Ee Reuling
Hayward, CA 94546
Aug 21, 2013

I agree, as permits can be costly, and take away from our efforts to feed the hungry, and homeless in our city. We should not add bureacracy and additional costs to these efforts, rather work with all stakeholders on effective cost savings solutions that benefit the poor. Jesus said "whatever you have done to the least of these, there also you have done to me." We should take heed and do our best to serve the poor, without adding unnecessary costs an costly permits.

I have been helping with the Sacred Space Ministry in both Oakland and Hayward, In both places we provide spiritual and physical needs for the homeless of both communities. What is amazing is that before we leave, the participants always pick up after themselves. There is no mess left on the ground, lawns, etc.. All trash is picked up and placed in the proper containers. The population that we serve are not a problem for the locations that we are located. When we leave the majority of the participants also leave unless the weather is nice and they wish to enjoy the comfort that good weather offers. Please do not place more restrictions on our ministry than what are already present. They will only become a burden for the poor and limit our ability to assit the community's most needy. Thank you. Providing food to the hungry is not problematic. If there are associated litter problems, they should be dealt with as litter. If there are noise problems, deal with them as noise. Does providing refreshments (food) at a City function constitute a problem? Focus on real problems. Providing food to hungry people addressed that nutritional problem. Putting out more trash containers addressed litter problems. Watering a park solves the problem of dying vegetation. If you see a problem, target THAT problem, not a collateral issue.

The Rev. John Rawlinson, Ph.D.
San Leandro, CA 94577
Aug 19, 2013

Yes! We don't need more expense for the city, we do need to support all efforts to feed our needy citizens! Thank you Sara and all who are working with you.

The need for such a center is long overdue. On any given day, there are approximately 200 folks homeless in Hayward. Factor in residents who are unemployed, or struggling just to exist, and their families, and those should be a major focus of the City - at all levels.

Jerry Wrenn

PRODUCTIVITY NOT PERMITS

On October 1, the Hayward City Council will review a proposed permitting process for outdoor meal program providers. Rather than instituting or developing a new permitting process, we urge the City Council to focus on productivity, not permits and demonstrate our support through the resolution below.

Whereas Food is a fundamental human need and sharing food can be inspired by faith, friendship, and/or abundance; and

Whereas the US Census reports that nearly 20,000 Hayward residents are unemployed and/or living in poverty, meal programs can be a lifeline, but can also be difficult to access if scattered throughout a broad area; and

Whereas debris, waste, and poor and unsafe behaviors occur in public spaces, however, these issues do not occur during the meal programs; and

Whereas outdoor meal programs do not currently have the capacity to provide accommodations for hygiene, participant contribution, and/or supportive services in addition to meals which are important in the move from crisis to stability.

Therefore, be it resolved that RICHARD VALLE (business/organization name) supports collaborative solutions to ending hunger and homelessness. Such solutions must resolve the impact of negative behaviors in public spaces while reflecting the needs of the local community and creating opportunities to address the underlying causes of those needs. Building on the models demonstrated by South Hayward Parish in Hayward, Delancy Street in San Francisco, and Aware Recycling in San Diego we strongly urge the City of Hayward to:

A Productivity Focused Action Plan

1. Identify the specific problems/concerns in the target downtown areas (Ex: Lucky's Center, B Street Corridor, Safeway Center, Library Plaza, Portuguese Park, City Parking Lots)

2. Enforce applicable existing ordinances (Ex: Litter, Encroachment, Property Damage)

3. By January 2014, create a concrete implementation plan for a centralized resource, recovery, and productive engagement center through the existing *Task Force to End Hunger and Homelessness*. This center would relocate the meal programs out of public spaces and utilize existing resources more efficiently.

PRODUCTIVITY NOT PERMITS

On October 1, the Hayward City Council will review a proposed permitting process for outdoor meal program providers. Rather than instituting or developing a new permitting process, we urge the City Council to focus on productivity, not permits and demonstrate our support through the resolution below.

Whereas Food is a fundamental human need and sharing food can be inspired by faith, friendship, and/or abundance; and

Whereas the US Census reports that nearly 20,000 Hayward residents are unemployed and/or living in poverty, meal programs can be a lifeline, but can also be difficult to access if scattered throughout a broad area; and

Whereas debris, waste, and poor and unsafe behaviors occur in public spaces, however, these issues do not occur during the meal programs; and

Whereas outdoor meal programs do not currently have the capacity to provide accommodations for hygiene, participant contribution, and/or supportive services in addition to meals which are important in the move from crisis to stability.

Therefore, be it resolved that The Cobbler's Shoe Store supports collaborative solutions to ending hunger and homelessness. Such solutions must resolve the impact of negative behaviors in public spaces while reflecting the needs of the local community and creating opportunities to address the underlying causes of those needs. Building on the models demonstrated by South Hayward Parish in Hayward, Delancy Street in San Francisco, and Aware Recycling in San Diego we strongly urge the City of Hayward to:

1. Utilize existing policies, procedures and ordinances to protect public safety and resources/spaces, rather than creating a new, costly permitting process that does not address underlying causes of hunger or homelessness.

2. Work with all stakeholders to develop a centralized service center that efficiently and effectively utilizes existing resources to address the root causes of hunger and homelessness in Hayward by January of 2014.

3. Apply existing laws - especially those related to smoking, litter, encroachment, and parking - consistently and fairly across the City.

Whereas Food is a fundamental human need and sharing food can be inspired by faith, friendship, and/or abundance; and

Whereas the US Census reports that nearly 20,000 Hayward residents are unemployed and/or living in poverty, meal programs can be a lifeline, but can also be difficult to access if scattered throughout a broad area; and

Whereas debris, waste, and poor and unsafe behaviors occur in public spaces, however, these issues do not occur during the meal programs; and

Whereas outdoor meal programs do not currently have the capacity to provide accommodations for hygiene, participant contribution, and/or supportive services in addition to meals which are important in the move from crisis to stability.

Therefore, be it resolved that we, the undersigned, support collaborative solutions to ending hunger and homelessness. Such solutions must resolve the impact of negative behaviors in public spaces while reflecting the needs of the local community and creating opportunities to address the underlying causes of those needs. Building on the models demonstrated by South Hayward Parish in Hayward, Delancy Street in San Francisco, and Aware Recycling in San Diego we strongly urge the City of Hayward to:

1. Utilize existing policies, procedures and ordinances to protect public safety and resources/spaces, rather than creating a new, costly permitting process that does not address underlying causes of hunger or homelessness.

2. Work with all stakeholders to develop a centralized service center that efficiently and effectively utilizes existing resources to address the root causes of hunger and homelessness in Hayward by January of 2014.

3. Apply all existing laws - especially those related to smoking, litter, encroachment, and parking - consistently and fairly across the City.

PRODUCTIVITY NOT PERMITS

On October 1, the Hayward City Council will review a proposed permitting process for outdoor meal program providers. Rather than instituting or developing a new permitting process, we urge the City Council to focus on productivity, not permits and demonstrate our support through the resolution below.

Whereas Food is a fundamental human need and sharing food can be inspired by faith, friendship, and/or abundance; and

Whereas the US Census reports that nearly 20,000 Hayward residents are unemployed and/or living in poverty, meal programs can be a lifeline, but can also be difficult to access if scattered throughout a broad area; and

Whereas debris, waste, and poor and unsafe behaviors occur in public spaces, however, these issues do not occur during the meal programs; and

Whereas outdoor meal programs do not currently have the capacity to provide accommodations for hygiene, participant contribution, and/or supportive services in addition to meals which are important in the move from crisis to stability.

Therefore, be it resolved that we, the undersigned, support collaborative solutions to ending hunger and homelessness. Such solutions must resolve the impact of negative behaviors in public spaces while reflecting the needs of the local community and creating opportunities to address the underlying causes of those needs. Building on the models demonstrated by South Hayward Parish, Delancy Street in San Francisco, and Aware Recycling in San Diego we strongly urge the City of Hayward to:

1. Identify the specific problems/concerns in the target downtown areas (Ex: Lucky's Center, B Street Corridor, Safeway Center, Library Plaza, Portuguese Park, City Parking Lots)

2. Enforce applicable existing ordinances (Ex: Litter, Encroachment, Property Damage)

3. By January 2014, create a concrete implementation plan for a centralized resource, recovery, and productive engagement center through the existing *Task Force to End Hunger and Homelessness*. This center would relocate the meal programs out of public spaces and utilize existing resources more efficiently.

Whereas the US Census reports that nearly 20,000 Hayward residents are unemployed and/or living in poverty, meal programs can be a lifeline, but can also be difficult to access if scattered throughout a broad area; and

Whereas debris, waste, and poor and unsafe behaviors occur in public spaces, however, these issues do not occur during the meal programs; and

Whereas outdoor meal programs do not currently have the capacity to provide accommodations for hygiene, participant contribution, and/or supportive services in addition to meals which are important in the move from crisis to stability.

Therefore, be it resolved that we, the undersigned, support collaborative solutions to ending hunger and homelessness. Such solutions must resolve the negative impacts of meal programs in public spaces while reflecting the needs of the local community and creating opportunities to address the underlying causes of those needs. Building on the models demonstrated by South Hayward Parish in Hayward, Delancy Street in San Francisco, and Aware Recycling in San Diego we strongly urge the City of Hayward to:

1. Utilize existing policies, procedures and ordinances to protect public safety and resources/spaces, rather than creating a new, costly permitting process that does not address underlying causes of hunger or homelessness.

2. Work with all stakeholders to develop a centralized service center that efficiently and effectively utilizes existing resources to address the root causes of hunger and homelessness in Hayward by January of 2014.

3. Apply all existing laws - especially those related to smoking, litter, encroachment, and parking - consistently and fairly across the City.

PRODUCTIVITY NOT PERMITS

On October 1, the Hayward City Council will review a proposed permitting process for outdoor meal program providers. Rather than instituting or developing a new permitting process, we urge the City Council to focus on productivity, not permits and demonstrate our support through the resolution below.

Whereas Food is a fundamental human need and sharing food can be inspired by faith, friendship, and/or abundance; and

Whereas the US Census reports that nearly 20,000 Hayward residents are unemployed and/or living in poverty, meal programs can be a lifeline, but can also be difficult to access if scattered throughout a broad area; and

Whereas debris, waste, and poor and unsafe behaviors occur in public spaces, however, these issues do not occur during the meal programs; and

Whereas outdoor meal programs do not currently have the capacity to provide accommodations for hygiene, participant contribution, and/or supportive services in addition to meals which are important in the move from crisis to stability.

Therefore, be it resolved that we, the undersigned, support collaborative solutions to ending hunger and homelessness. Such solutions must resolve the impact of negative behaviors in public spaces while reflecting the needs of the local community and creating opportunities to address the underlying causes of those needs. Building on the models demonstrated by South Hayward Parish, Delancy Street in San Francisco, and Aware Recycling in San Diego we strongly urge the City of Hayward to:

1. Utilize existing policies, procedures and ordinances to protect public safety and resources/spaces, rather than creating a new, costly permitting process that does not address underlying causes of hunger or homelessness.

2. Work with all stakeholders to develop a centralized service center that efficiently and effectively utilizes existing resources to address the root causes of hunger and homelessness in Hayward by January of 2014.

3. Apply existing laws - especially those related to smoking, litter, encroachment, and parking - consistently and fairly across the City.
