

# Earthquake Safety Program

## Notification

### Start of Construction at Hayward Station

November 2013

Dear Community Member:

As part of our systemwide Earthquake Safety Program, we will begin strengthening structures at the Hayward Station to better withstand future earthquakes. Beginning the week of **November 18th 2013** work areas will be fenced in and you may see large equipment accessing the site such as dump trucks, backhoes and lifts. Stage one of construction consists of a temporary relocation of one disabled parking space, as well as bicycle rack relocations. During construction, pedestrian access in and around the station will change periodically. Please proceed around construction areas with caution and watch for signs with safety information and other notices. You can also expect temporary construction-related noise, dust, and traffic impacts. We will monitor noise and dust and work to minimize any inconveniences. We appreciate your patience and cooperation during this work.

#### Construction Work Details

- **Description:** Constructing temporary enclosures, demolishing concrete structures, adding steel and concrete to foundations, strengthening column caps, limited asbestos and lead-based paint removal (following all protocols), and protecting utilities and equipment
- **Location:** Various areas throughout and around the station, parking lots, platform, stairs and other locations
- **Start Date:** Approximately mid November 2013
- **Duration:** Approximately 2 years
- **General Work Hours:** Work can occur between the hours of 7 am and 7 pm, Monday through Saturday, with some night work and emergency work as necessary

Similar work to strengthen San Leandro, South Hayward and Fremont stations will also occur between mid-2013 and early 2015. Earthquake Safety Program construction will be underway at various locations throughout the BART system over the next five years, and is expected to be complete by the end of 2018. As always, safety is BART's top priority. Our aim is to strengthen BART as quickly as possible, while maintaining BART service.

# **ABOUT THE PROGRAM**

The BART Earthquake Safety Program will upgrade the original BART system to ensure safety and the ability to return to operation shortly after a major earthquake.

Priorities for strengthening work include BART's Transbay Tube, elevated structures and many stations.

Thank you for supporting BART's efforts to protect this Bay Area asset.
